RAYA MENU

A new development

in today's restaurant industry: technology and innovation play a key role in improving the customer experience. The offline restaurant menu, specially developed by **Raya**, is a new tool for displaying digital menus without the need for a constant internet connection. This application, with its modern design and user–friendly interface, offers a simple, fast and professional way to provide a better service to customers.

The main advantages of this application are: **Offline access,** but can also be used without internet, suitable for environments where a permanent connection to the network is not possible.

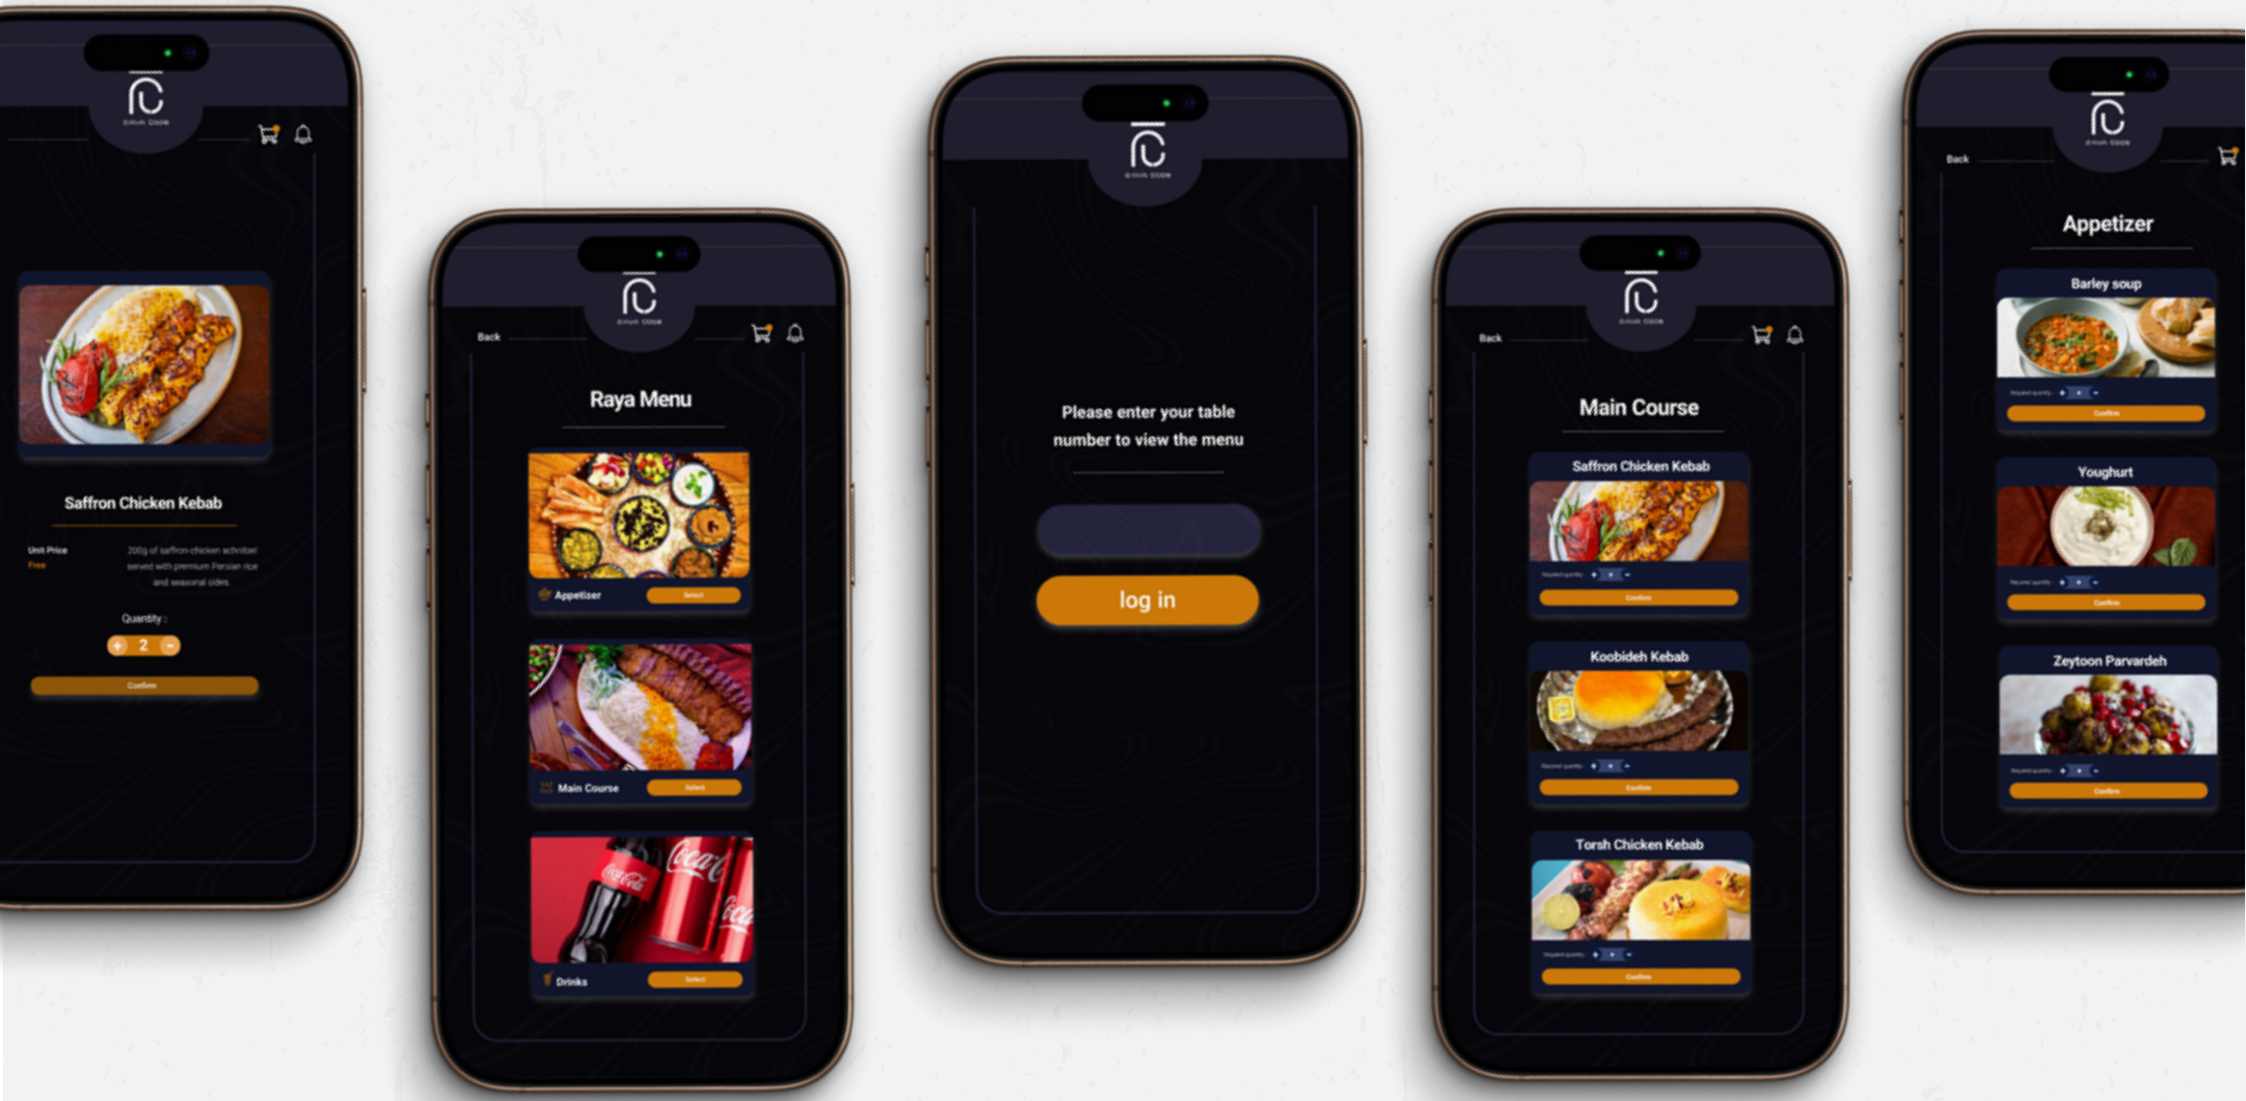
Responsive design, the current design is specific to Raya and can be changed and customized to your needs and branding.

Easy delivery in an app in a simple and attractive environment for customers and easy management of your hotel restaurant orders.

Visual appeal, professional graphic design that provides a pleasant experience for customers.

At Raya, we are proud to offer this delivery platform, which we can customize to meet the individual needs of each collection.

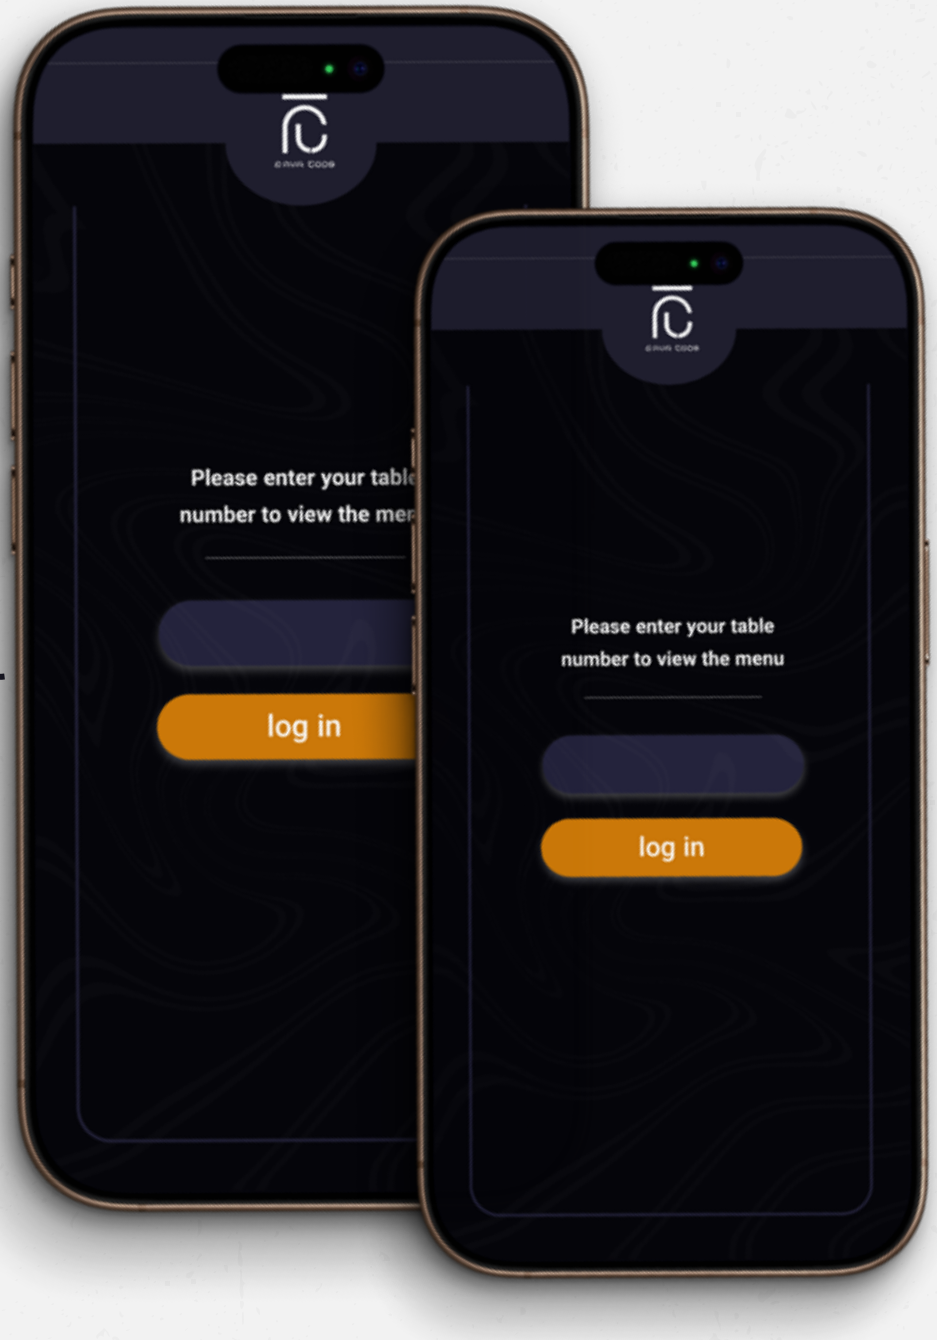
Application pages



Login page

To gain access to the exclusive hotel and restaurant menu and experience our services in a unique way, follow these simple steps:

First you need to enter your table number.

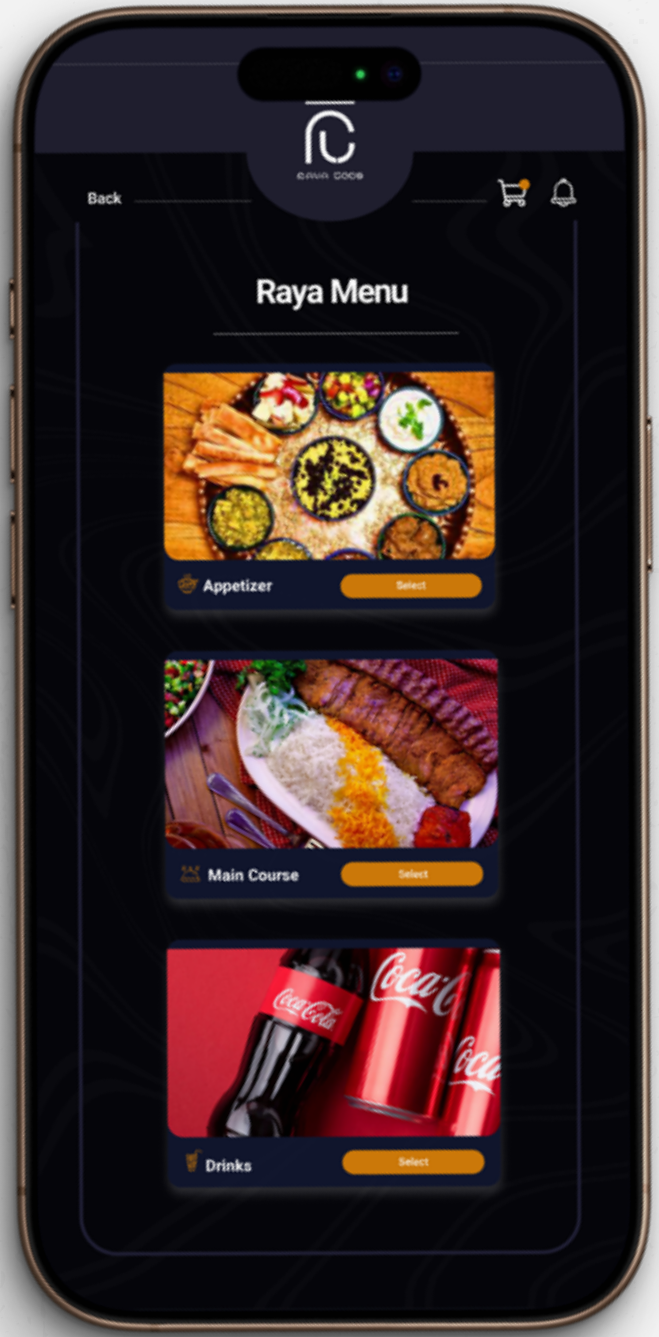


This process has been designed to ensure your secure and exclusive access and provide you with a personalized and safe experience. Following these steps will open the door to a world of different flavors and exciting possibilities.

Home page

After completing the check-in process, you will have access to the hotel's exclusive restaurant menu. This menu has been carefully and creatively designed to offer you a delicious and appealing experience.

In this section you can choose from a variety of unique starters, main courses and drinks.



All dishes are based on the menu of the hotel restaurant. Browse the menu and order the perfect meal.

The pages with the menu items of your restaurant

After accessing the restaurant menu, you can view a variety of delicious dishes from each category by selecting the individual sections, such as starters, main courses and drinks.

You can access the rest of the restaurant menu by clicking the "Back" button.

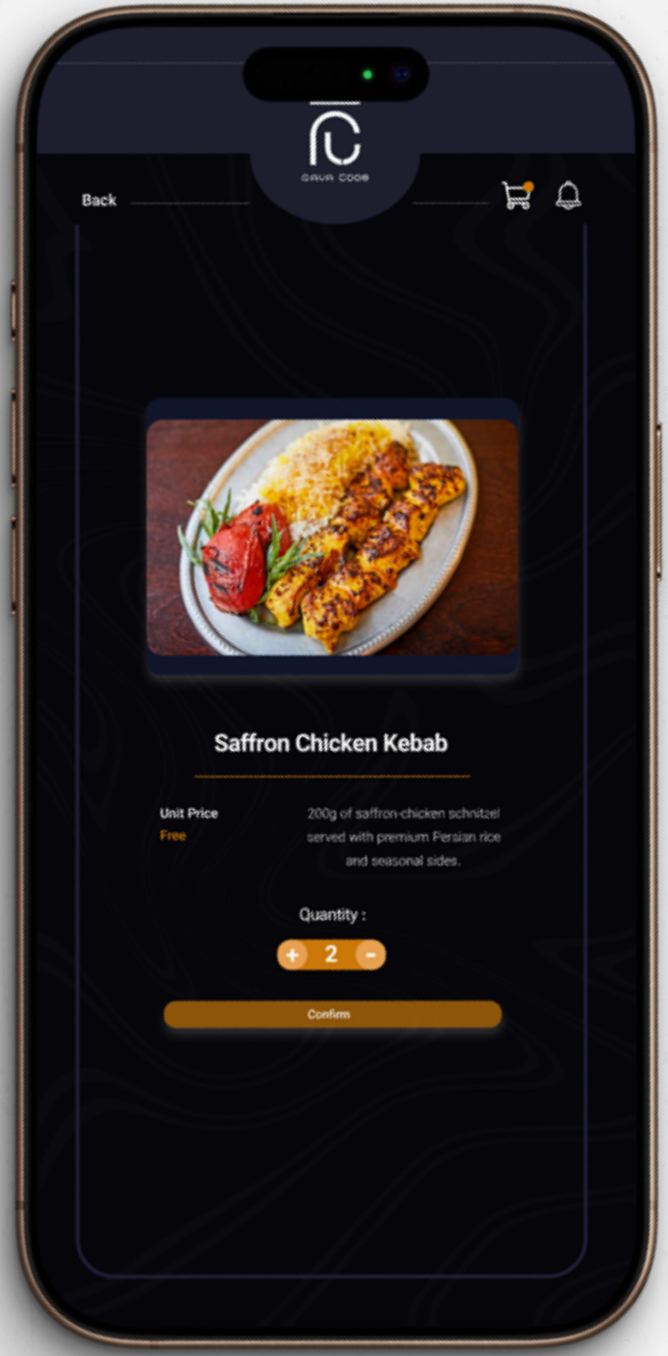
At this stage, you can select and register the desired items by clicking + and _.

This process gives you the freedom to compose your menu carefully and without haste according to your tastes and wishes.

Order details page

When you select an item from the hotel restaurant menu, you will be redirected to a page where all the details of that item are displayed in full. On this page you will find information about ingredients and special features.

In this section you can find the details of the selected item, view the price of the selected item and enter the price that corresponds to your desired quantity.

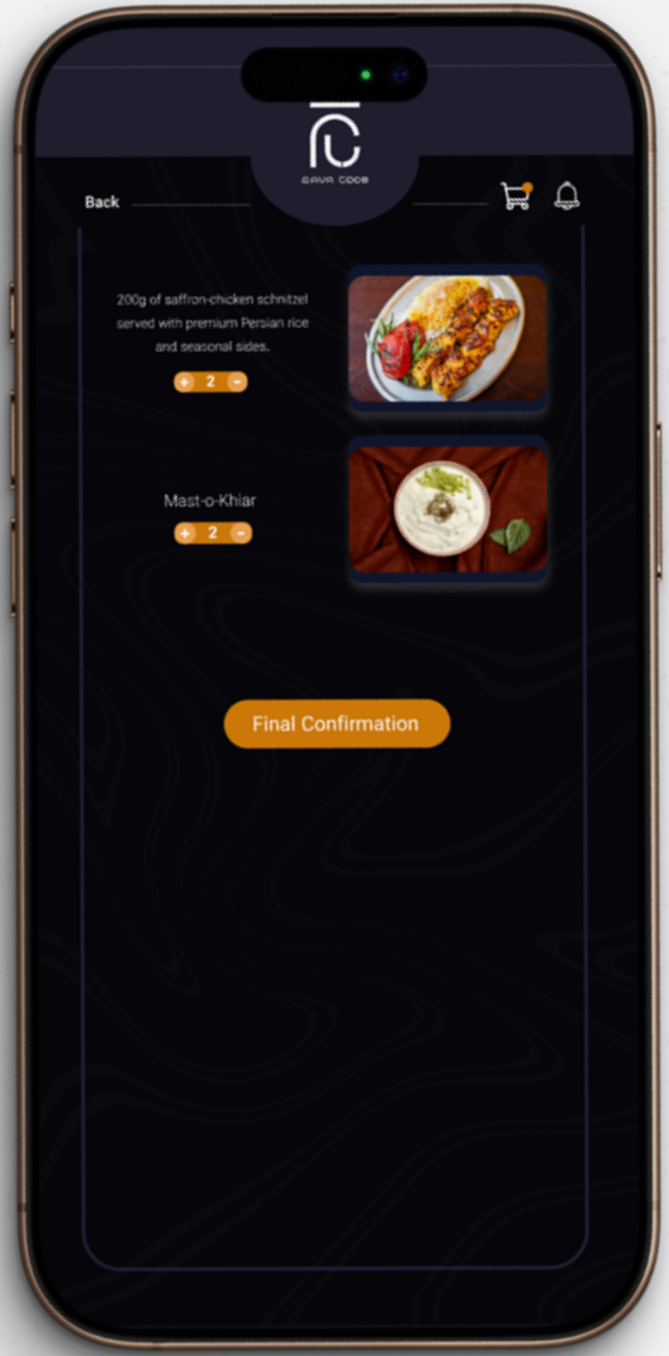


All the information on this page should help you to make a choice that suits your taste and to place your order without any confusion.

Order registration page

After selecting the desired dishes from the restaurant menu, you will be redirected to a new page where you can finalize your order.

On this page you can check all selected items and make changes or corrections if necessary.

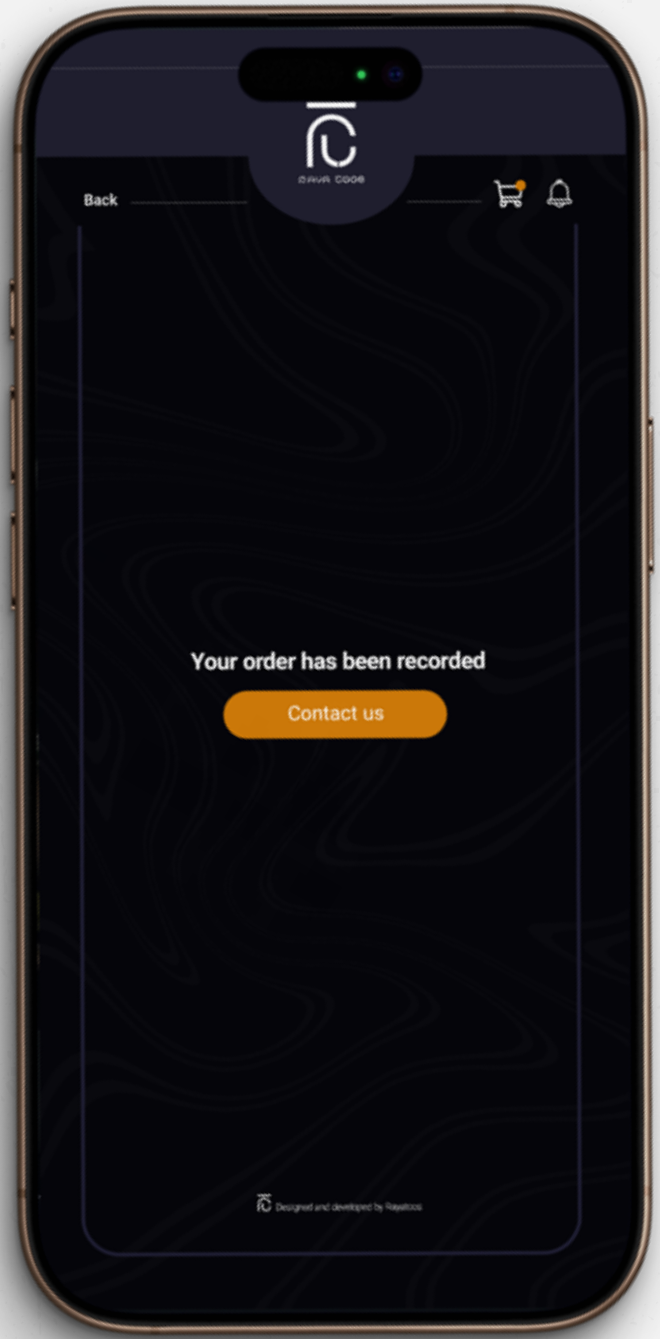


Once you have reviewed and confirmed your selections, you can confirm your order and proceed to the final step to complete the checkout process. This page gives you the peace of mind that you will be able to complete your order and enjoy the services of the hotel restaurant.

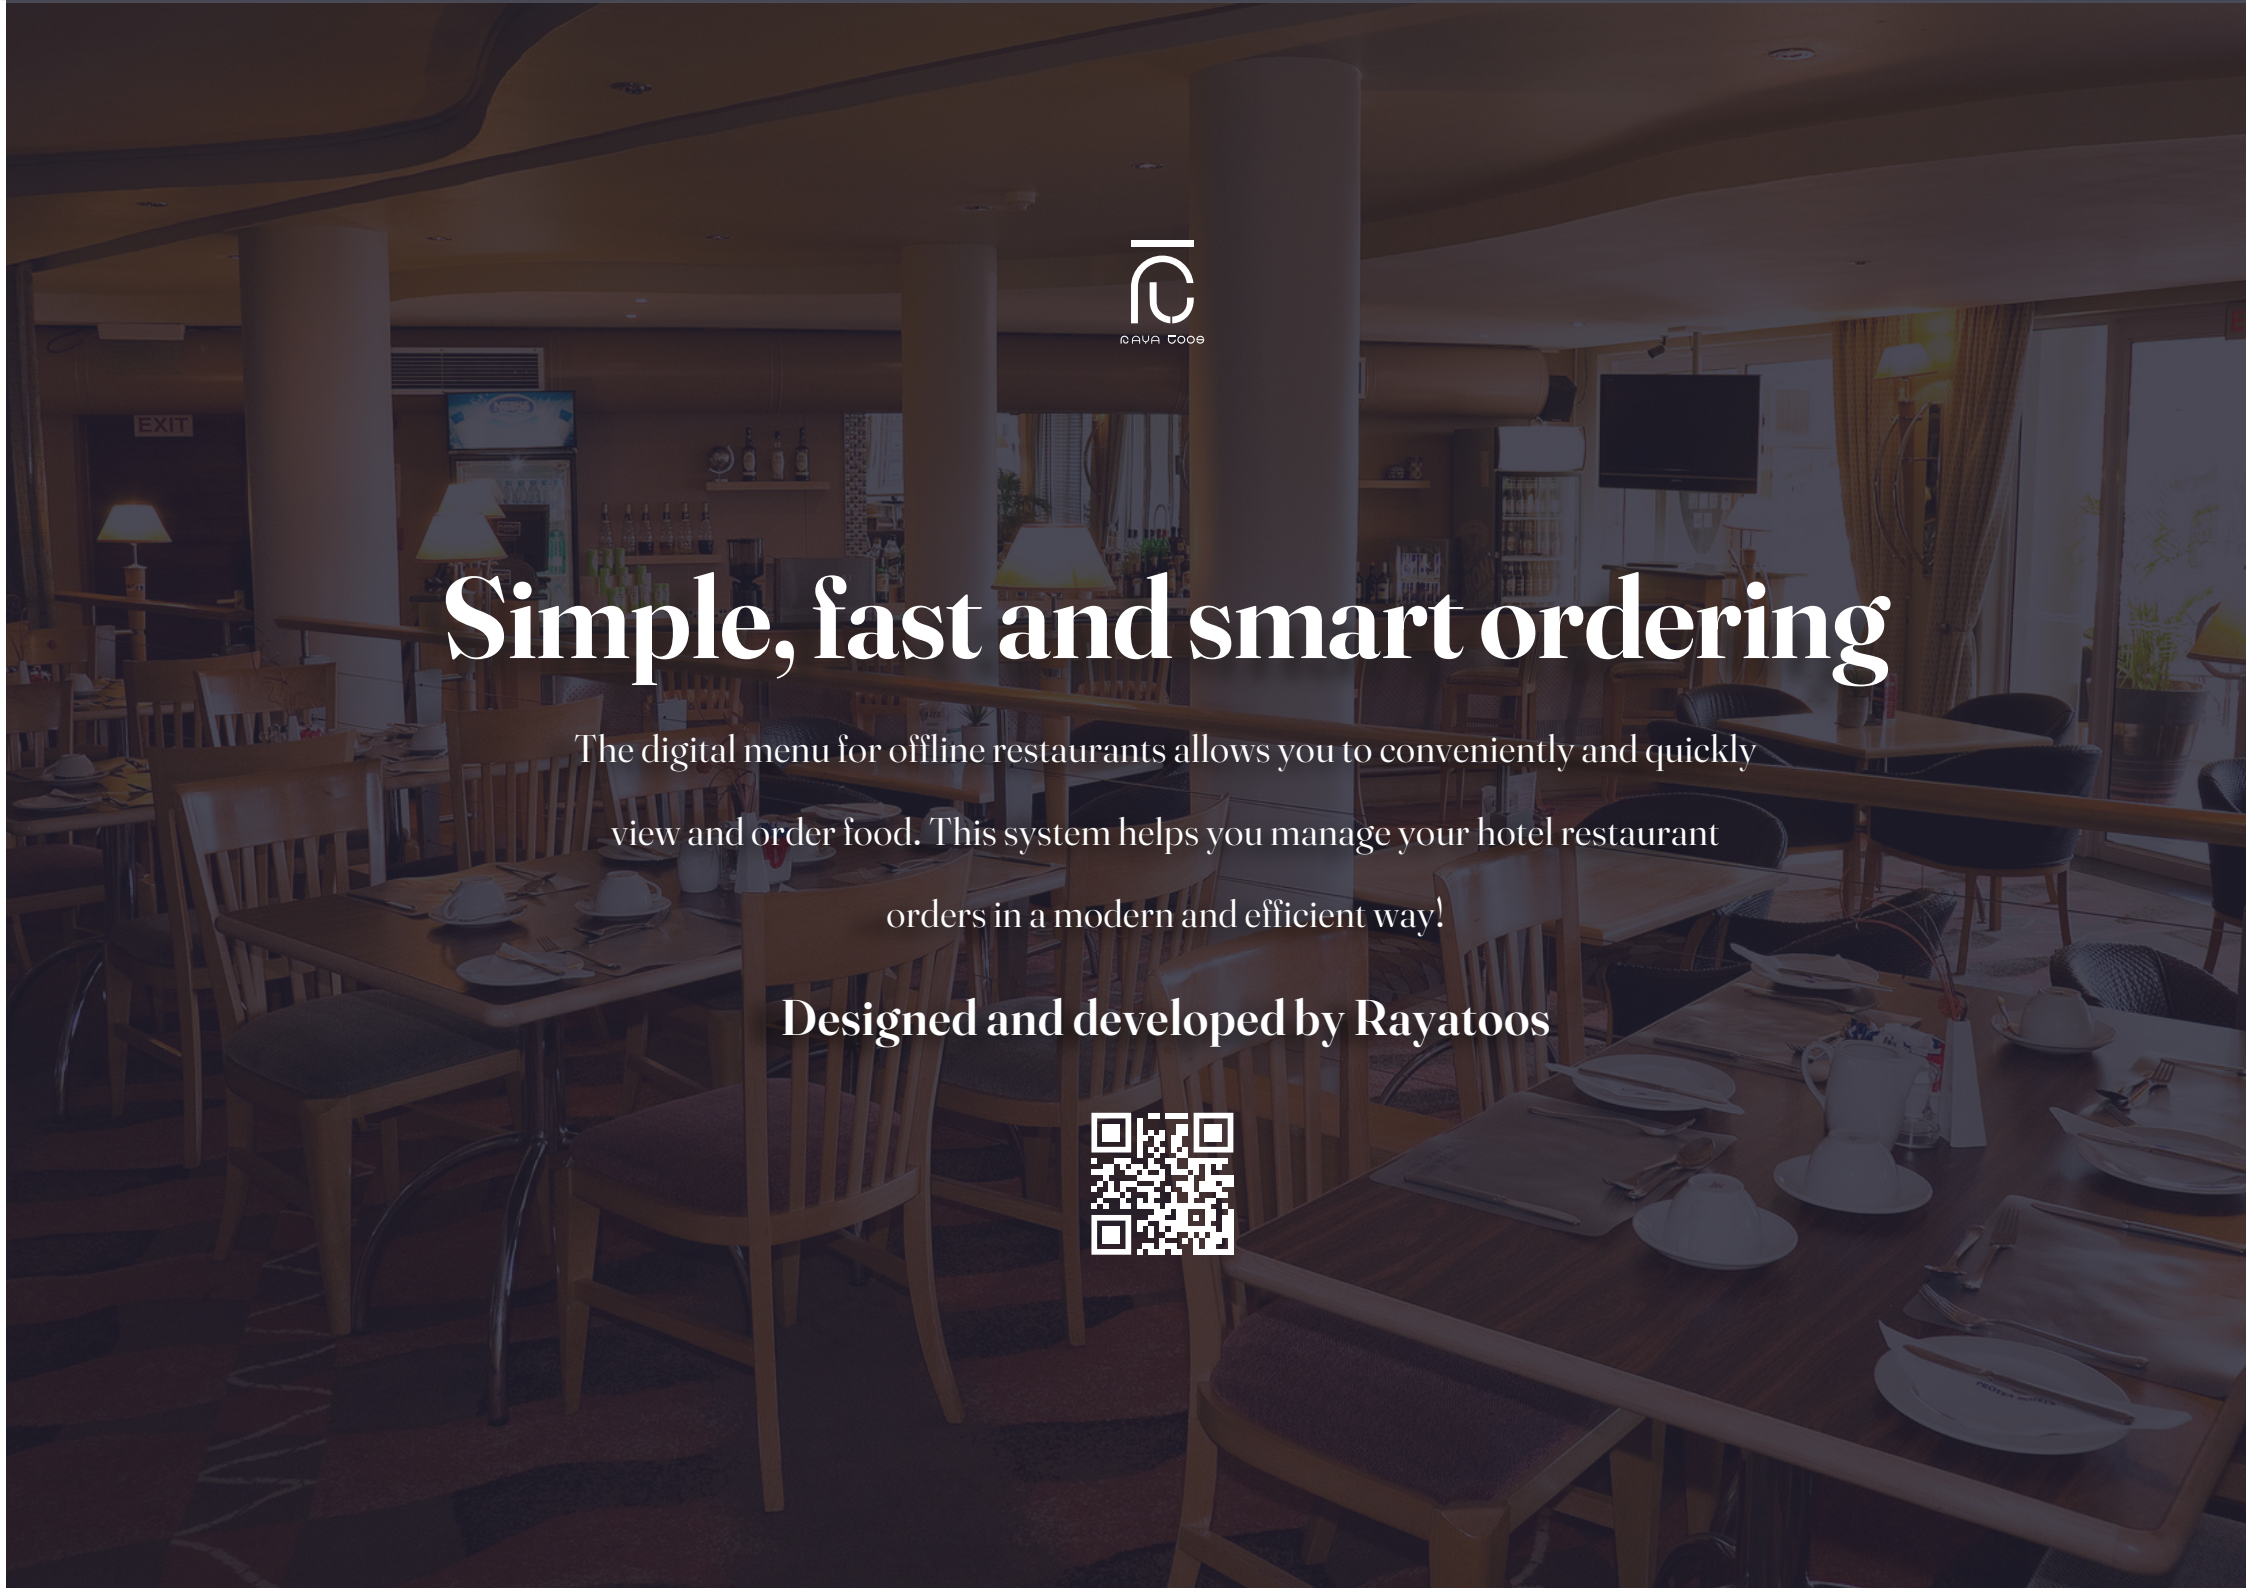
Your order has been confirmed!

At this stage, your order has been successfully registered and confirmed. All the items you have selected will now be dispatched and prepared.

At this stage, all your order details are automatically sent to the restaurant and kitchen management system and an order form is created for you.



This process ensures that the preparation of your order and delivery begins promptly and accurately. All information, including order items and delivery times, is accurately available to your team to provide your guests with impeccable service.



Simple, fast and smart ordering

The digital menu for offline restaurants allows you to conveniently and quickly view and order food. This system helps you manage your hotel restaurant orders in a modern and efficient way!
